**Dr. S. Moore**  
Editor-in-Chief  
IEEE Communications Magazine

Dear Dr. Moore, Dear Members of the Editorial Board,

Please find enclosed our original research manuscript entitled "*Desktop and Mobile Web Page Comparison: Characteristics, Trends, and Implications*," which we would like to have considered as an open call publication in the IEEE Communications Magazine.

As the manner of interaction and presentation of content on the World Wide Web has evolved in recent years, so have the means of access due to the proliferation of mobile devices. In our overview, we compare the characteristics of web pages that are available in desktop and mobile client versions based on a publicly available dataset.

We believe that the timely dissemination of our overview paper would appeal to the readers of the IEEE Communications Magazine, as we additionally present detailed trends from 2011 to 2013 and resulting implications.

We have no conflicts of interest to declare and confirm that this manuscript has not been published elsewhere and is not under consideration by another journal.

We thank you and the editorial board for your efforts and consideration of our submission.

Patrick Seeling
